Open to remote Full-stack / Frontend / Backend opportunities

PROFESSIONAL SUMMARY

Full-stack Engineer with 3+ years of experience delivering production-grade web and mobile features across frontend and backend systems in digital banking. Strongest in TypeScript, React, React Native, Next.js, and Node.js, with hands-on experience in GraphQL, REST APIs, PostgreSQL, Redis, Kafka, microfrontends, and microservices. Experienced in end-to-end feature delivery, testing and release support, production readiness, and cross-functional requirement refinement, with additional Acting Product Owner experience bridging business and engineering.

CORE SKILLS

Languages: TypeScript, JavaScript
Frontend: React, React Native, Next.js, Nuxt.js, Redux, React Hook Form
Backend & APIs: Node.js, Express.js, NestJS, GraphQL, REST APIs, Joi
Data & Messaging: PostgreSQL, MongoDB, Supabase, Redis, Kafka
Testing & Delivery: Jest, Mocha, Supertest, Jenkins, OpenShift, Git
Architecture & Product Delivery: Microfrontends, Microservices, Feature Flags, Backlog Refinement, UAT, Release Readiness

PROFESSIONAL EXPERIENCE

Full-stack Engineer – Jenius Digital Banking Aug 2023 – Present
PT Bank SMBC Indonesia

- Build and maintain lending-related features across frontend and backend systems for Jenius Digital Banking, a large-scale product serving more than 6 million users.
- Own feature delivery end-to-end, from requirement refinement and technical implementation through testing support, release preparation, and post-release monitoring.
- Develop scalable React Native solutions within a microfrontend architecture using shared UI components, custom hooks, React Hook Form, Redux, and Context.
- Build and maintain Node.js backend services and GraphQL/REST integrations for lending activation, lending limit management, and feature-flag-related domains.
- Improve responsiveness and engineering efficiency through optimized GraphQL usage, lazy loading, lazy queries, memoization, reusable components, Redis caching, and Kafka-based event workflows.
  Contribute to pull request reviews, SIT/UAT, Jenkins and OpenShift releases, production-readiness monitoring, and intern onboarding; consistently received Exceeds Expectations performance ratings.

ADDITIONAL PRODUCT OWNERSHIP EXPERIENCE

Acting Product Owner Feb 2025 – Mar 2026
PT Bank SMBC Indonesia | Concurrent assignment alongside engineering role

- Prepared PRDs, delivery-ready tickets, user stories, and acceptance criteria while maintaining technical feasibility and implementation clarity.
- Led backlog grooming, requirement clarification, prioritization, and scope alignment across business stakeholders, engineers, QA, Tech Leads, and Engineering Managers.

- Coordinated SIT, UAT, production verification, release monitoring, and rollout readiness; bridged business and engineering communication using hands-on technical context.

SELECTED PROJECT EXPERIENCE

Account Arena | Full-stack Engineer Jan 2026

- Built a full-stack marketplace for buying and selling game accounts using Next.js and Supabase/PostgreSQL, covering customer-facing flows and backend service logic.
- Created a shared package architecture for reusable types and validation, with Redux Toolkit, Zod, and Nodemailer supporting application state, schemas, and email workflows.
- Applied modular TypeScript architecture and shared business logic to improve maintainability across frontend and backend applications.
- Repository: github.com/accarena07/account-arena

Tickitz | Full-stack Engineer – Team Project March 2023

- Developed movie-ticket booking flows, purchase history, authentication, profile management, and transaction journeys using Next.js and Express.js.
- Contributed to UI/API integration, collaborative delivery, and shared code ownership across separate frontend and backend repositories.
- Frontend: github.com/raihanirvana/TICKETING-FE | Backend: github.com/purapuraturtle/tickits-be

Raz Furniture | Full-stack Engineer – Team Project March 2023

- Contributed to frontend and backend development for a furniture commerce platform, including core purchasing flows and cross-repository integration.
- Backend: github.com/raihanirvana/raz-be | Frontend: github.com/digi-squad/raz-fe

EDUCATION

Bachelor of Physics – University of Lampung 2018 – 2022

GPA: 3.33 / 4.00

Thesis: Arduino-Based Automation of Meyer Rod Control Using C++

CERTIFICATION & ADDITIONAL INFORMATION

Certification: Full-stack Engineering – Fazztrack, 2023

Languages: Indonesian; English (Professional Working Proficiency)
